

What is AICE?

The “Cambridge AICE Diploma” is an international qualification, which requires learners to study one compulsory core subject, called Cambridge AS-Level Global Perspectives and Research. In addition to that, learners must study subjects across three curriculum areas: Mathematics and Science, known as Group 1, Languages, Group 2 and Arts and Humanities, Group 3. There is also an option to study interdisciplinary subjects but this is OPTIONAL.

There are over 50 subjects to choose from across the four subject groups, and you must collect 7 “credits”. An “AS-Level” qualification is a one-year course and gains you one credit. An “A-Level” qualification is a two-year course and gains you two credits. Additionally, the compulsory core subject, Cambridge AS-Level Global Perspectives and Research, gains you one credit. Since you need seven credits total, the courses you study can be customised to your desires – for example, you can do three two-year “A-Level” courses, earning you 6 credits or even six one-year “AS-Level” courses, also earning 6 credits (add one to each because of the compulsory core subject).

Cambridge “A-Level” subjects are graded from A* - E, while “AS-Level” subjects are graded from A – E. Each grade is awarded a certain number of points and based on the total number of points you get, you earn a Cambridge AICE Diploma Qualification. The highest form you can earn is Distinction, then Merit, then Pass.

But why do it?

- AICE classes are approved by almost all international universities.
- There are diplomas linked to AICE classes.
- Courses are very flexible and you can tailor your courses to your passions.
- Subjects require critical thinking and independent research.
